

District Engineer Supplemental Questionnaire

1. Describe your program management experience including tracking/overseeing projects, budgets and managing the work of both in-house staff and outside consultants.
2. Describe your background related to the various functions associated with this position (District Engineer).
3. Briefly describe your experience working with regulatory and code enforcement agencies. Include in your response your knowledge of drinking water regulations, CEQA and permitting processes in the State of California, building codes, fire codes, and other pertinent codes and regulations governing water treatment.
